Re: Phase I Environmental Site Assessment
374 Tamworth Road
Tamworth, New Hampshire
NHDES Site No. 199812122
SITEEVALHW, NHDES Project No. 42908

Dear Mr. Rose:

Nobis Group® (Nobis) is pleased to present this Phase I Environmental Site Assessment (ESA) for the above-referenced property. This work was performed within the context of ASTM International (ASTM) E 1527-21, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”.

In the signing of this document, we declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 Code of Federal Regulations (CFR) 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. This report is subject to the limitations in Appendix A.

nobis

Thank you for the opportunity to be of service to you. Please do not hesitate to contact us if you have any questions.

Sincerely,

NOBIS GROUP®

Travis Cohen, EIT
Staff Engineer

SUMMARY

Nobis Engineering, Inc. d/b/a Nobis Group® (Nobis) has completed a Phase I Environmental Site Assessment (ESA) of the property located at 374 Tamworth Road in Tamworth, Carroll County, New Hampshire (*subject property*). The parcel comprising the subject property is identified by the Town of Tamworth Assessor's office as Lot 35 on Tax Map 202 (MBLU 202-35).

The subject property consists of a 12.48-acre lot currently developed with an open-front garage and storage shed. The remainder of the property is a mix of open field and forested area that abuts the Swift River to the west. The property has been owned by Norman Cloutier since 2015. Based upon a records review and interview with Mr. Cloutier, the property owner, the subject property once operated as a sawmill that had lumber treatment and dipping operations on the subject property, and as a hub for a trucking company that stored and maintained trucks. It has since been rented for storage.

Residential properties are located to the north, south, and east of the subject property along Tamworth Road. Across the Swift River to the west is undeveloped forested land. According to Town of Tamworth Zoning Map, the subject property is zoned for commercial and industrial.

Nobis conducted a site reconnaissance on July 26, 2024. Mr. Cloutier described how after a fire at the sawmill, debris was moved to the riverbanks where it remained until he cleared it after purchasing the property. During the reconnaissance, Nobis observed several building structures including garages and an office, a possible dipping basin for lumber treatment, a 55-gallon drum of spilled material, a monitoring well, a dug supply well, piles of sawdust, and piles of miscellaneous building material.

Historical data including topographic maps, aerial photographs, Sanborn maps, and municipal records suggest that the subject property was developed with a sawmill until the late 1980s, at which time the structure burned down. The Town of Tamworth Fire Department had no record of the structure fire. Forst Trucking also used the property as a hub for their activities and repaired and maintained vehicles in the garages present at the property. The subject property has since been an unpaved grass-covered lot with several buildings used for various purposes. Dipping of lumber, a form of treatment to prevent pests and decay, was also used at the sawmill.

Forst Trucking is registered with the New Hampshire Department of Environmental Services (NHDES) as an aboveground storage tank (AST) facility and as previously having an underground storage tank (UST) on the property behind the three-bay garage. The UST has removal

documentation; however the ASTs were not observed during the site visit and have no closure documentation.

The Environmental Database Search (EDR) report dated July 8, 2024, indicated that two (2) records were found to be associated with the subject property or abutting properties from NH AST registration and NH UST registration. Six environmental records, NH Leaking Underground Storage Tanks (LUST), NH Registered UST, NH ALL Sites, and one Mines Mineral Resources Data System (MRDS) site, were identified with 1 property within a 1/8-mile radius of the subject property. Because of their distance, hydraulic location (cross-gradient) and/or closed regulatory status, none of the records/sites are expected to adversely impact the subject property.

Nobis has completed a Phase I ESA of the property at 374 Tamworth Road, Tamworth, New Hampshire. This work was performed in accordance with ASTM E 1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process". Any exceptions to, or deviations from, this practice are described in Sections 1.4 and 10.0.

This assessment has identified four (4) Recognizable Environmental Conditions (RECs):

REC-1: Potential use of per- and polyfluoroalkyl substances (PFAS) containing foams during firefighting efforts at the subject property.

Potential use of PFAS containing firefighting foam to combat historical fires, and subsequent discharge to soil and groundwater at the subject property constitutes a REC.

REC-2: Two (2) 2,000-gallon former ASTs containing diesel with no closure documentation.

Two 2,000-gallon ASTs were previously documented at the subject property with no closure documentation. Given the lack of data demonstrating no past releases from these ASTs, this constitutes a REC.

REC-3: Drum of unknown material discharged to ground surface.

A 55-gallon drum of unknown material was found to have tipped and cured on the ground surface near the outhouse and garage. Due to the unknown nature of the material, its presence constitutes a REC.

REC-4: Lumber dipping operations during the subject property's use as a sawmill.

Dipping of lumber, a form of treatment to prevent pests and decay, was used at the sawmill. The liquids used in dipping are often creosote (a distillate of tar), pentachlorophenol (a pesticide), or arsenicals (containing arsenic). Given the unknown procedures and handling of treatment

chemicals and treated lumber, these substances pose a potential risk of release to soil and groundwater, and constitute a REC.

This assessment identified one (1) Historical REC (HRECs):

HREC-1: One (1) 500-gallon Diesel Underground Storage Tank (UST).

The subject property previously housed a 500-gallon UST containing diesel. The tank was removed in July 1997 and is documented in a report from Lakes Region Environmental Contractors, Inc. Soil samples were taken from the tank grave and no exceedances of Soil Remediation Standards (SRS) were detected. The Site Plan provided in the report appears to show the tank to the south of the three-bay garage (labeled Shed in the report's site plan). The NHDES response to the closure report concludes that it did not appear that a discharge of petroleum that impacts surface water or groundwater had occurred.

There are no Controlled RECs (CRECs) or Vapor Encroachment Conditions (VECs) in association with the subject property. No *de minimis conditions* (DMCs) were observed

One (1) Business Environmental Risk (BERs) was identified.

BER-1: Suspect Hazardous Building Materials

Suspect lead-based paint and suspect asbestos containing material (ACM) associated with former building materials may be present at the subject property due to the historic use of the subject property.

1.0 INTRODUCTION

Nobis Engineering, Inc. d/b/a Nobis Group® (Nobis) has completed a Phase I Environmental Site Assessment (ESA) for the property identified by the Town of Tamworth's Assessor's office as Lot 35 on Tax Map 202 (MBLU 202-35) located in Tamworth, Carroll County, New Hampshire (subject property). This work was performed in accordance with American Society for Testing and Materials (ASTM) E 1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process". This Phase I ESA was completed as part of due diligence requirements in connection with potential purchase and sale of the subject property.

1.1 Purpose

The objective of this Phase I ESA was to assess environmental conditions at the subject property and vicinity for Recognized Environmental Conditions (RECs), historical RECs (HRECs), Controlled RECs (CRECS) and de minimis conditions associated with the presence of *petroleum products* or *hazardous substances* in conformance with ASTM E 1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The ASTM Standard Practice E 1527-21 defines these terms as follows:

RECs are the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

HRECs are a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

CRECs are a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

De minimis conditions (DMCs) are those situations that do not present a material risk of harm to public health or the environment and generally would not be subject to enforcement action if brought to the attention of the regulating authority.

In addition, a Tier I vapor encroachment screening (VES) was completed as part of this assessment. This screening is conducted in general accordance with ASTM E2600-15, *Standard Guide for Vapor Encroachment Screening on property Involved in Real Estate Transactions* dated October 2015.

1.2 Detailed Scope-of-Services

To meet the objectives of the Phase I ESA, Nobis performed the following tasks:

- Reviewed New Hampshire Department of Environmental Services (NHDES) and EPA regulatory database listings concerning environmental conditions at, and in the vicinity of the subject property, as provided by Environmental Data Resources, Inc. (EDR).
- Contacted officials of the Town of Tamworth, New Hampshire to obtain information pertaining to present and historical environmental conditions at the subject property and adjacent environs.
- Reviewed available history of ownership and land usage records and interviewed persons with knowledge of the subject property to obtain past usage information.
- Reviewed available aerial photographs and/or topographic maps to aid in assessing local geology and in assessing past and present land use at the subject property and vicinity.
- Conducted a reconnaissance of the subject property on July 26, 2024, to assess surficial and general environmental conditions at the subject property and adjacent environs for evidence of RECs associated with past or present *petroleum product* or *hazardous substance* handling or storage activities.
- Prepared this report summarizing the results of the assessment.

No ASTM non-scope items are included as part of this Phase I ESA.

1.3 Significant Assumptions

It is assumed that federal, state, and local records are generally complete and current. The preparer assumes that all individuals contacted and/or interviewed during the preparation of this Phase I ESA have responded in good faith. Nobis is entitled to rely on all information gathered during this scope of work.

1.4 Limitations and Exceptions

This Phase I ESA is intended to assess the subject property for significant environmental issues. It is not intended as a guidance document for potential future remedial action. In addition, this ESA is subject to the limitations included in Appendix A.

1.5 Special Terms and Conditions

No special terms or conditions apply to this project.

1.6 User Reliance

This Phase I ESA has been prepared exclusively for the use of Nobis' Client. With the exception of release to any third party by Nobis or the Client, reliance on this report is for informational purposes only. Nobis makes no warranties to person(s) or entity(ies) other than the Client to rely on the information provided in this report. Any person(s) or entity(ies) wishing to use this information shall do so with the written permission of Nobis and the contract for which it is intended. Prior approval from Nobis is required for disclosure of information obtained in this report.

Continued viability of this report is subject to ASTM E 1527-21 Sections 4.6 and 4.8. If this ESA will be used by a different user(s) (third party) than the user(s) for whom the ESA was originally prepared, the third party must also satisfy the user(s) responsibilities in Section 6 of ASTM E 1527-21.

The initial effort conducted for this Phase I ESA was obtaining the third-party environmental database report provided by EDR (summarized in Section 4.1), dated July 8, 2024. As per ASTM E 1527-21 Section 4.6.1, this report is considered viable for 180 days after initiation of this effort, or through January 4, 2025. Within 180 days of the date of viability, this report can be updated per the requirements of ASTM E 1527-21 within 180 days after the date of viability expiration, or through July 3, 2025.

1.7 User Obligations

As defined in ASTM E 1527-21, the user responsibilities are as follows:

- Check title records for environmental liens and activity and use restrictions.
- Disclose specialized knowledge and experience.
- Explain why the purchase price is below market value, if it is discounted.
- Answer interview questions in good faith.
- Provide information as outlined in Section 6 of ASTM E 1527-21 including completing the User Questionnaire attached in Appendix B.

For the purpose of this ESA, the *user* is defined as the Town of Tamworth. A representative of the *user* provided the information required under Section 3.0, as well as responses to the User Questionnaire.

1.8 Data Gaps

Efforts were made by Nobis to obtain *user* provided information and review all reasonably ascertainable resources to determine historical uses of the subject property and surrounding properties to identify the possibility of RECs in connection with the subject property. Objectives are completed within the framework of research outlined above; however, data failure may be encountered. As defined by ASTM, data failure or data gaps occur when historical research is reasonably ascertained and reviewed, but the intended objectives have not been met. This ESA was limited by the following:

- The past owners of the subject property and adjoining property owners were not interviewed regarding the past usage of the target property.

It is the opinion of the Environmental Professionals writing this report that the data gap noted above has not significantly impacted the ability to identify RECs in association with the subject property.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Location and Legal Description

The subject property is located at 374 Tamworth Road in Tamworth, Carroll County, New Hampshire, and is identified by the Town of Tamworth on Tax Map 202 as Lot 35 (MBLU 202-35). According to the Town of Tamworth Assessor's records, the parcel comprises an area of

approximately 12.5-acres and is currently owned by Norman Cloutier of Tamworth, New Hampshire. Ownership of the subject property and a legal description is contained in a 2016 Deed recorded in Book 3250 Page 431 at the Carroll County Registry of Deeds; since this time it has been subdivided and the subject property is identified as Lot 2 in Plan Book 240 Page 4. A Locus Plan is provided as Figure 1 and a Site Plan is provided as Figure 2. Photographs taken during the property reconnaissance on July 26, 2024, are provided on Figure 3.

2.2 Previous Environmental Investigations

Nobis is not aware of previous environmental investigations to have been conducted at the subject property.

2.3 Site and Vicinity General Characteristics

The subject property is currently a developed lot with a wooden open-front garage, a garage with 3 (three) bays, an office building, and an open front shed. The topography of the subject property is generally flat and level. The general surrounding area slopes gradually to the west towards the Swift River. The subject property has an approximate elevation of ± 479 -feet above mean sea level.

Residential properties are located to the north, south, and east of the subject property along Tamworth Road. The residential property to the north is developed with a single-family home near the property boundary and approximately 400 feet (ft) from the garage on the subject property. This property was previously part of the subject property but was subdivided as shown in a plan recorded in Book 240 Page 4 in the Plan Book at the Carroll County Registry of Deeds. The residential properties to the south and east are developed with single-family houses. Undeveloped forested land is located across the Swift River to the west.

2.4 Current Use of the Site

The subject property is currently a developed lot with one stand-alone garage, an office building with an attached garage and an open-front storage shed, and a small stand-alone open shed. The subject property is not currently in use but has recently been used as storage for equipment.

2.5 Descriptions of Structures, Roads, Other Improvements on Site

There are three enclosed buildings on the property, an office with attached garage, a detached garage, and a stand alone open-front shed. A driveway serves the subject property, it enters from the south from Tamworth Road. The driveway is unpaved. According to the owner, a sawmill was located on the subject property but burned down in the 1980s. An empty open-front shed is present along the eastern boundary of the field of the subject property. According to the property

owner, it previously contained a 4-foot-deep concrete basin that has since been filled with gravel by the owner.

An open-front garage containing lumber and various retail chemicals is present. Attached to this garage are two large bays with garage doors at the front. In the rear of this building several rooms are present. Adjacent to this garage is an office section. A dug well is located to the southwest of the structure which is the presumed source of water for the office and bathroom facilities.

Further north on the subject property is a garage containing 3 (three) garage door covered bays. This building has an outhouse connected to it on the western wall. Several piles of debris including lumber and building materials are located near the south of the open-front garage and northwest of the northern garage. Brushy growth exists around all structures. The remainder of the property is forested.

2.6 Current Use of Adjoining Properties

Residential properties are situated to the north, south, and east of the subject property. The property to the west consists of undeveloped wooded land across the Swift River.

2.7 Subject Property Physical Setting

The subject property is depicted on the U.S. Geological Survey (USGS), Tamworth, NH - 2024 7.5-minute topographic quadrangle at an elevation of approximately ± 400 feet referenced to the North American Vertical Datum of 1988.

Bedrock beneath the subject property is comprised of gray metapelite and metawacke, Pragian gray metamorphosed sedimentary and volcanic rocks. (Horton, J.D., C.A. San Juan, and D.B. Stoeser, 2017, The State Geologic Map Compilation (SGMC) geodatabase of the conterminous United States: USGS Data Series 1052) The depth to bedrock is unknown.

According to the United States Department of Agriculture's Natural Resource Conservation Service (NRCS) Web Soil Survey (<http://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx>), soil beneath the subject property consists of Colton gravelly sandy loam, Sunday loamy fine sand, and primarily Duane fine sandy loam, with all having slopes of 0 to 3 percent. Soil type at the subject property is depicted in the NRCS Soil Map included in Appendix C.

The subject property is located on the National Flood Insurance Program Flood Insurance Rate Map (FIRM) for Carroll County, New Hampshire – Map Number 33003C0460D, effective March 19, 2013. The FIRM image was available in the Federal Emergency Management Agency (FEMA) online database and was reviewed as part of this assessment and is included in Appendix C. The

map depicts the subject property primarily in Zone X, an area which is outside the 500-year flood and protected by levee from 100-year flood (minimal risk or 0.2% annual chance of flood), and partially in Zone A, an area with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.

3.0 USER PROVIDED INFORMATION

Ms. Lianne Prentice, a representative of the Town of Tamworth responded to a User Questionnaire on August 28, 2024. The completed questionnaire is attached in Appendix B.

3.1 Environmental Liens

The *user* is not aware of any environmental liens for the subject property.

3.2 Activity and Use Restrictions

The *user* is not aware of activity and use limitations for the subject property.

3.3 Specialized Knowledge

The *user* does not possess any specialized knowledge of the subject property.

3.4 Valuation Reduction for Environmental Issues

This section does not apply, as the subject property is being given to the Town of Tamworth.

3.5 Commonly Known or Reasonably Ascertainable Information

The *user* indicated that they are aware the subject property was developed as a sawmill and a trucking service.

3.6 Obviousness of Presence of Contamination

The *user* indicated that they only have assumptions based on stated prior uses.

3.7 Reason for Performing Phase I

The *user* stated that the town was offered the gift of the property, and due to past uses that could cause the Town of Tamworth future liability, the ESA was performed to mitigate potential liability.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

As part of this ESA, state and federal environmental records were reviewed in the form of an environmental database report provided by EDR. A copy of the database report is included as Appendix D. Information was also obtained from other local municipal and state records. The following is a summary of significant findings from this review:

Federal and State Regulatory Agencies

EPA National Priority List (NPL)

The EPA's NPL is a list of confirmed or proposed Superfund facilities. The subject property was not identified as an NPL facility. No NPL facilities were identified within a ± 1.0 -mile radius of the subject property.

Delisted NPL

The Delisted NPL is a list of sites removed from the NPL when no further response is appropriate. The subject property was not identified as a delisted NPL facility. No delisted NPL facilities were identified within a ± 0.5 -mile radius of the subject property.

Superfund Enterprise Management System (SEMS), including Federal Facility Sites

SEMS (formerly CERCLIS) tracks sites and remedial activities in support of the EPA Superfund Program. This database contains data on potentially hazardous waste sites reported to EPA by states, municipalities, private companies, and private persons; site proposed for inclusion on the NPL, and sites being assessed for possible inclusion on the NPL. The subject property was not identified as a SEMS facility. No SEMS facilities were identified within a ± 0.5 -mile radius of the subject property.

Superfund Enterprise Management System Archive (SEMS-ARCHIVE)

The SEMS-ARCHIVE (formerly CERCLIS-NFRAP) database is a database of archived SEMS facilities at which, to the best of the EPA's knowledge, assessment has been completed and the EPA has determined that no further steps will be taken to list this site on the NPL. This decision

does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site. The subject property was not identified in the SEMS-ARCHIVE database. No SEMS-ARCHIVE facilities were identified within a ± 0.5 -mile radius of the subject property.

Emergency Response Notification System (ERNS) Releases

The ERNS database is the EPA's database of emergency response actions. The subject property was not identified as an ERNS site.

Federal Resource Conservation and Recovery Act (RCRA) Handlers

The RCRA database is the EPA's database of registered hazardous waste generators and Treatment, Storage or Disposal Facilities (TSDF). The subject property was not identified as a TSDF, corrective action (CORRACTS) facility, RCRA Large Quantity Generator (RCRA-LQG), RCRA Small Quantity Generator (RCRA-SQG), or RCRA Very Small Quantity Generator (RCRA-VSQG).

The database report did not contain listings for RCRA CORRACTS facilities within a ± 1 -mile radius, RCRA non-CORRACTS TSD facilities within a ± 0.5 -mile radius, and RCRA-LQG or RCRA-SQG within a ± 0.25 -mile radius of the subject property. The database report did not contain listings for RCRA-VSQG within a ± 0.25 -mile radius of the subject property.

Federal Institutional Control / Engineering Control Sites

The Federal Institutional Control / Engineering Control (IC / EC) registry is the EPA's database of Superfund or RCRA sites that have either institutional or engineering controls in place as part of the remedial action to achieve or maintain protection of human health and the environment. The subject property was not identified as a Federal IC/EC. No Federal IC/EC sites were identified within a ± 0.5 -mile radius of the subject property.

State Institutional / Engineering Control Sites

The State IC/EC database consists of state-maintained databases which contain information on sites with Activity and Use Restrictions (AURs) where remedial action relies on the restriction of site activities and uses to achieve or maintain protection of human health and the environment. The subject property was not identified as a State IC/EC site. No State IC/EC sites were identified within a ± 0.5 -mile radius of the subject property.

State and Tribal Hazardous Waste Site Inventory (SHWS) Sites

The SHWS Sites database is a database of confirmed disposal sites, locations to be investigated, waived, deleted, and reserved sites. The subject property was not identified as a SHWS. No SHWS sites were identified within a ± 1.0 -mile radius of the subject property.

State and Tribal Spill Reports

The SPILLS database contains surface, groundwater, and hazardous materials spills as reported to NHDES. Additionally, SPILLS 90 records were obtained from FirstSearch, and includes spill and release records pertaining to chemical, oil and/or hazardous substances spills. The subject property was not identified as a SPILL site by the EDR report.

State and Tribal Landfill and/or Solid Waste Disposal Sites (SWF/LF)

State/Tribal SWF/LF type records contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet certain RCRA criteria for solid waste landfills or disposal sites. The subject property was not identified as a current or former SWF/LF. No State or Tribal SWF/LF sites were identified within a ± 0.5 -mile radius of the subject property.

State and Tribal Leaking Underground/Above-ground Storage Tank (LUST/LAST) List

The LUST/LAST list is a database of sites where leaking underground and above-ground storage tanks have been identified/reported and is maintained by the NHDES. The subject property was not identified as a LUST/LAST site.

The database report identified no LAST sites and one (1) LUST site within ± 0.50 -mile radius of the subject property. The LUST site is not located within ± 0.125 -mile radius. The Remick Estate LUST site is located 0.495-miles from the subject property. Nobis reviewed the state files for this release online via the NHDES OneStop database. Based upon Nobis's review, this site is not expected to adversely impact the subject property based on the closed regulatory status and distance from the subject property.

State and Tribal Underground Storage Tank (UST) and Aboveground Storage Tank (AST) List

The UST/AST list is a database of registered underground and aboveground storage tanks maintained by NHDES. The subject property was identified as both an AST facility and an UST facility. The subject property previously housed one (1) 500-gallon UST and two (2) 2,000-gallon ASTs containing diesel. The UST was registered sometime prior to being removed in July 1997. The ASTs were registered in 1998 as integrated secondary containment tanks (e.g. "tank-in-a-

box”). More information regarding these tanks is available below. The database report lists no UST facilities and no other AST facilities within a ± 0.25 -mile radius of the subject property.

Federal Brownfields Sites

The Federal Brownfields Sites database assists EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield Grant Programs. The subject property was not identified as a Federal Brownfields site. No Federal Brownfield sites were identified within a ± 0.5 -mile radius of the subject property.

State and Tribal Brownfields Sites

The NHDES maintains a database of Brownfields sites that are registered with the agency. The database may not include the federal Brownfields sites. The subject property was not identified as a brownfields site. No State or Tribal Brownfield sites were identified within a ± 0.5 -mile radius of the subject property.

Orphan Summary Sites

According to EDR, unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the subject property. The database report contained a listing for two (2) unmapped facilities. Further research indicated that the two (2) facilities were either outside the ± 1 -mile radius or had closed regulatory status from NHDES.

4.2 Vapor Encroachment Screening

As specified in the ASTM E1527-21 standard, Nobis completed a VES for the subject property. The screening was prepared in general compliance with ASTM E2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The objective of the VES was to determine if a vapor encroachment condition (VEC) exists or does not exist relative to the subject property. A VEC is defined as

“the presence or likely presence of chemical(s) of concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.”

A VEC is a potential exposure pathway, specifically to building occupants, whereby volatile organic contamination present in soil and groundwater may partition into the vapor phase and migrate into soil gas and indoor air of a building, if present.

On Site: No on-site sources of vapor encroachment (e.g. UST, contaminated soil, groundwater plume, etc.) were identified during this assessment. Based on this information, a VEC due to an on-site source does not appear to exist.

Off-Site: To conduct the VES of the nearby area, Nobis conducted a detailed review and analysis of the EDR report with particular focus on the follow two types of sites:

1. Off-site properties that are impacted by non-petroleum spills or releases (i.e., chlorinated volatile organic compounds (CVOCs) and/or semi-volatile-organic compounds (SVOCs) and are located within approximately **1,750 feet** of the subject property, and,
2. Off-site properties that are impacted by petroleum spills or releases and are located within approximately **525 feet** of the subject property.

Our review of the site-specific environmental database indicates that no non-petroleum impacted sites are located within the above-described radii of the subject property. No petroleum impacted sites are located within the above-described radii of the subject property. Based on this information, it is Nobis's opinion that a VEC at the subject property due to an off-site source does not appear to exist.

4.3 Additional Environmental Sources

Based on the database listings provided by EDR, Nobis also completed an online database search using the NHDES's OneStop (<https://www4.des.state.nh.us/DESOnestop/BasicSearch.aspx>) for select listed facilities. Information pertaining to the selected facilities identified above are summarized below.

Forst Transportation (Subject Property), NHDES Site No. 199812122,

AST ID No. 9812122

The subject property previously housed two (2) 2,000-gallon ASTs containing diesel. The location of these tanks is unknown and there were no obvious indications where these ASTs were located during the site visit. Photos available on the NHDES Onestop appear to show the tanks behind the three-bay garage. The tanks were registered in 1998 as integrated secondary containment tanks (e.g. "tank-in-a-box"). A violation was issued in 2005; however, subsequent documentation indicates the ASTs were compliant within 3 months.

UST ID No. 0115030

The subject property previously housed a 500-gallon UST containing diesel. The tank was removed in July 1997 and is documented in a report from Lakes Region Environmental

Contractors, Inc. Soil samples were taken from the tank grave and no exceedances of Soil Remediation Standards (SRS) were detected. The Site Plan provided in the report appears to show the tank to the south of the three-bay garage (labeled Shed in the report's site plan). The NHDES response to the closure report concludes that it did not appear that a discharge of petroleum that impacts surface water or groundwater had occurred.

Wendall Dickey Residence, NHDES Site No. 201504056

OPUF Project No. 34947

Irving Oil overfilled an AST, and it resulted in the discharge of 5-gallons of #2 fuel oil being directly discharged to ground surface. Four (4) drums of contaminated soil were removed. Due to the proximity of the Wendall Dickey Residence site to the subject property, confirmation of site closure was obtained from NHDES OneSop. The site closed in 2015 and met all groundwater protection rules at the time of closure.

Town of Tamworth Municipal Records

On July 26, 2024, Nobis reviewed records for the subject property at the Town of Tamworth Offices. Historical documentation from the local records review is provided in Appendix E and summarized below.

Carroll County Registry of Deeds: Nobis obtained a deed dated 2016 (Book 3250, Page 0431). The seller is identified as Kenneth M. Forst, and the purchaser is identified as Norman A. Cloutier (the current owner).

Tax Assessor Department: Property tax cards dating back to 2019 were reviewed at the City Assessor's Office.

Code Administration/Building Department/Planning: The available files included

- A survey conducted in 1976 for the owner at the time was submitted to the Tamworth Town Planning Board for unknown reasons.
- Property assessment records dating to the time the sawmill and trucking depot operated.
- An abstract of title from Luigi Castello granted to Arlie Covell (both previous owners)
- A plan of subdivision prepared for the current owner submitted to the planning board in 2018
- A design of a septic disposal system created for Kenneth Forst, the owner of the trucking depot

Fire Department: This department had no record of usage of any USTs or ASTs or the fires at the property.

Health Department: Nobis contacted this department and received no reply. No information or documents on the property were acquired as a result.

4.4 Historical Use Information on the Site

Historical topographic maps, aerial photographs, Sanborn® Fire Insurance Maps and City-Directories obtained from EDR are provided in Appendix D. Review of the historical information included in the database report indicates the following:

Topographic Maps

Readily available historic USGS topographic maps dated 1931, 1958, 1987, 2001, 2012, 2015, 2018 and 2021 were provided by EDR, and were reviewed to ascertain area conditions.

The 1931 map depicts Tamworth center and shows a structure on the subject property, but due to the map scale it cannot be determined what buildings they may be. There is significant wetland areas depicted to the southwest.

Like the 1931 map, structures exist in the vicinity of the subject property on the 1958 map, but due to the map scale it cannot be determined if they are located on the subject property. Additional building construction is depicted to the southeast of the subject property on Depot St.

A structure is depicted on the subject property in the 1987 map. Continued building construction is shown to the north, south, west of the subject property. A gravel pit is now shown to the east.

Like the 1987 map, many structures are shown in the vicinity of the subject property on the 2001 map. The gravel pit is still shown.

The 2012, 2015, and 2018 maps do not show buildings but depicts roadways in vicinity of the subject property like current conditions.

Sanborn Fire Insurance Maps

During the late 19th Century, companies such as the Sanborn® Company began preparing maps of central business districts for use by fire insurance companies. These maps were updated and expanded geographically periodically through the 20th Century. Fire insurance maps often indicate construction materials, specific property use, and the location of other features such as gasoline storage tanks.

EDR, a licensed Sanborn distributor, did not find any Sanborn Maps covering the subject property. Though not conclusive, this is indicative of a rural setting prior to 1950.

Aerial Photographs

Readily available historical aerial photographs supplied by EDR were reviewed for the subject property to obtain pertinent subject property information concerning the history of development on and in the vicinity of the subject property. Evaluation of these aerial photographs may be limited by the quality and scale of the image. Aerial photographs from 1956, 1960, 1974, 1981, 1985, 1992, 1998, 1999, 2008, 2011, 2014, and 2018 were reviewed and are summarized below.

The 1956 photograph shows the land to the west of the property being cleared and having very few trees in the vicinity, no buildings are shown on the property.

The 1960, 1974, and 1981 photographs show that the area around the property has grown in and resembles the current layout of the property. However, no buildings are visible.

The resolutions for the 1992 and 1998 photographs are not clear enough to ascertain if a building is present on the subject property.

The 1999 photograph shows the garage surrounded by what appears to be large trucks to the south and east of the garage. A home on Lot 1 appears in the photo.

In the 2011 and 2014 photographs, the property appears to resemble its modern setup, however, the shed on the southern portion of the property is not visible.

The 2018 photograph most closely resembles the current use of the property, no vehicles are visible, and the shed is visible in the photograph.

Local Street Directories

The city directories used in this study were made available through EDR and were reviewed at approximate 5-year intervals for historic subject property usage. City directories for the years 2000, 2005, 2010, 2014, 2017, and 2020 were reviewed during this assessment.

The city directories were reviewed for both 374 Tamworth Road and abutting properties at 286, 416, 420, and 274 Tamworth Road.

- The directories contained no listings for the subject property address.
- Individuals were listed at 286 Tamworth Road in the 2014, 2010, 2005, and 2000 directories.
- The occupants of 416 Tamworth Road were not listed in the directories.
- An individual was listed at 420 Tamworth Rd. in the 2000 directory.
- The occupants of 274 Tamworth Road were not listed in the directories.

Date of Development

Based on the information compiled for the assessment, it appears that the subject property was first developed with a sawmill in the early 1970's. The sawmill on the subject property reportedly burned down sometime circa 1986 and the property has since been used as a trucking hub and equipment storage.

4.5 Historical Use Information on Adjoining Properties

Properties to the north, south, and east of the subject property were historically used for residential purposes. Properties to the west have remained undeveloped land.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Nobis conducted a reconnaissance of the subject property on July 26, 2024, to observe general site conditions. All portions of the subject property were made accessible during the site visit. General site features for the subject property are shown on Figure 2. Site photographs are provided on Figure 3.

5.2 General Site Setting

The subject property is currently a developed lot with a wooden open-front garage, a garage with 3 (three) bays attached to an office building and an open front storage area, and a stand-alone open-front shed. The topography of the subject property is generally flat and level. The general surrounding area slopes gradually to the west towards the Swift River. The subject property has an approximate elevation of ± 479 -feet above mean sea level.

Residential properties are located to the north, south, and east of the subject property along Tamworth Road. The residential properties to the south and east are developed with single-family houses. Undeveloped forested land is located across the Swift River to the west.

5.3 Exterior Observations

Refer to Section 2.5 for a general description of site development and features.

A large two story wooden open-front shed is present on the subject property, used for storage of lumber and chemicals. Attached to this shed are two bays with garage doors facing the driveway to the east. A small office is attached. A dug well was observed approximately 50 feet southwest of the building. A debris pile of lumber and building materials is located to the south of the large open-front garage

Approximately 100 feet north, a separate garage with three bays each served by garage doors facing north. An outhouse is connected to this building on the western wall.. Behind the three-bay garage to the west is a 55-gallon drum that appears to have previously contained unknown material that tipped and leaked, and the material within has cured on the ground surface. The material appears similar to asphalt sealant or similar coating material.

Further to the south, an open-front building that previously contained a basin that has since been filled by the property owner. This building is suspected to have been part of historical lumber treatment that reportedly occurred at the subject site.

Several piles of sawdust material were present on the western forested boundary that Mr. Cloutier used to fertilize the grassy field section of the property.

A monitoring well is present in the southwestern section of the subject property. Mr. Cloutier recalled that this had been installed when the area was being considered for use as a leach field for a community septic treatment project, but was never constructed. Mr. Cloutier did not have any well construction logs for the monitoring well.

5.4 Interior Observations

There is a two-bay garage attached to the open-front storage area, behind the garage is an area with three rooms, one of which being a bathroom. The floors are concrete. The rooms were largely empty, though one room contained a water heater and a pressure tank. Heat is provided by oil and electricity. An approximately 275-gallon heating oil tank that was half filled is present in the larger garage room. No signs of leakage were observed. Overall, the interior was in good condition, however, the walls appeared to have grown mold. Utilities were not in service at the time of the visit.

The office area adjacent to the two-bay garage is plain, with carpeted flooring and storage areas for files.

The separate three-bay garage has concrete floors and storage areas around the building. Power utilities appeared to have once served this building but were not in service at the time of the visit. A wooden outhouse is connected to the garage and appeared to discharge directly to the ground surface but could not be fully determined.

6.0 INTERVIEWS

6.1 Interview with Current Property Owner

An interview was conducted with Mr. Norman Cloutier on July 26, 2024, during the site visit. Mr. Cloutier recalled the property being formerly developed with a sawmill and later, a trucking depot operated by Kenneth Forst. He mentioned he had owned the property since 2015. He recalled that several areas of waste were present from previous fires and from waste produced by the trucking operations. Mr. Cloutier cleared as much of this waste as he was able to. Mr. Cloutier described how the land was originally considered to be a leach field for the town as an alternate location.

6.2 Interviews with Occupants

The subject property has no occupants.

6.3 Interviews with Local Government Officials

Refer to Section 4.2 for additional information collected from representatives of the Town of Tamworth.

6.4 Interviews with Others

Nobis did not interview others.

7.0 FINDINGS

The Findings of the ASTM E 1527-21 Phase I ESA identify the known or suspected *RECs*, *Controlled RECs*, *Historical RECs*, and/or *de minimis* conditions at the subject property. The Opinion (Section 8.0) will discuss the impact to the subject property (*i.e.*, *REC*, *Controlled REC*, *Historical REC*, or *de minimis* conditions) and present the logic and reasoning for making that determination. Based on the information collected during a Phase I ESA of the 374 Tamworth Road property in Tamworth, New Hampshire, Nobis presents the findings detailed below.

The subject property is currently a developed lot with a wooden open-front shed attached to a garage with 3 (three) bays and an office building, a detached garage, and a stand-alone open front storage shed. The topography of the subject property is generally flat and level. The general surrounding area slopes gradually to the west towards the Swift River. The subject property has an approximate elevation of ±479-feet above mean sea level.

Residential properties are located to the north, south, and east of the subject property along Tamworth Road. The residential property to the north is developed with a single-family home near the property boundary and approximately 400 feet (ft) from the garage on the subject property. This property was previously in the same lot as the subject property but was subdivided as shown in a plan recorded in Book 240 Page 4 in the Plan Book at the Carroll County Registry of Deeds. The residential properties to the south and east are developed with single-family houses. Undeveloped forested land is located across the Swift River to the west.

Historical data including topographic maps, aerial photographs, Sanborn maps, and municipal records suggest that the subject property was developed with a sawmill sometime prior to the 1970s, until 1986 at which time several structures burned down. The Tamworth Fire Department had no record of the fire. The subject property was then used as a trucking depot for repair and storage until it was purchased by the current owner in 2015. During the use as a sawmill, lumber dipping operations occurred at the property. The historical uses of the property are often associated with petroleum and/or hazardous substances (mainly petroleum and metals), which may have had some impacts to surficial soils on the subject property due to leaks or improper storage.

The EDR report indicated (2) listing or records were found to be associated with the subject property, from NH AST and NH UST. Seven (7) environmental records (NHALL Sites, Mines MRDS, NH LUST, and NH UST and AST) were identified with one (1) property within a 1/8-mile radius of the subject property. Because of their distance, hydraulic location (cross-gradient) and/or closed regulatory status, none of the records/sites are expected to adversely impact the subject property.

The subject property previously housed a 500-gallon UST and two (2) 2,000-gallon ASTs containing diesel. The location of the UST was shown as south of the three-bay garage. The location of the ASTs is unknown but were not observed during the site visit. It is possible the ASTs were installed as a replacement to the UST in the same location. The tanks were registered in 1998 as integrated secondary containment tanks (e.g. “tank-in-a-box”). A violation was issued in 2005; however, the AST facility was listed as compliant within 3 months.

8.0 OPINION

The Opinion of the ASTM E 1527-21 Phase I ESA defines the environmental professional’s determination of the impact to the subject property (i.e., REC, HREC, CREC, DMC or VEC) of the conditions identified in the Findings (Section 7.0) and presents the logic and reasoning for making that determination. Based upon our review of the municipal and historical information

available for the subject property and adjoining properties, as well as the observations made during this Phase I ESA, Nobis' opinions regarding the Findings of this Phase I ESA are detailed below.

Recognized Environmental Conditions

REC-1: PAHs and per- and polyfluoroalkyl substances (PFAS) contamination from fires and firefighting efforts at the subject property.

Waste material from the burned buildings was bulldozed to the edge of the river where it remained for almost 40 years before it was removed by the owner. Due to the potential use of PFAS containing firefighting foam and the potential generation of PAH compounds during fires this constitutes a REC.

REC-2: Two (2) 2000-gallon former ASTs containing diesel with no closure documentation

Two (2) 2000-gallon ASTs were registered with the state in December of 1998. Currently, there are no ASTs on the property and were removed by the prior owner. No documentation is available regarding the closure and the potential for contamination is present and constitutes a REC.

REC-3: Drum of unknown material discharged to ground surface

A 55-gallon drum of unknown material was found to have tipped and cured on the ground surface behind the outhouse and garage. Due to the unknown nature of the material, its presence constitutes a REC.

REC-4: Lumber dipping operations during the subject property's use as a sawmill

Dipping of lumber, a form of treatment to prevent pests and decay, was used at the sawmill. The liquids used in dipping are often creosote (a distillate of tar), pentachlorophenol (a pesticide), or arsenicals (containing arsenic). These substances pose a risk to groundwater, and constitute a REC.

Historical Recognized Environmental Conditions

HREC-1: One (1) 500-gallon Diesel Underground Storage Tank (UST).

The subject property previously housed a 500-gallon UST containing diesel. The tank was removed in July 1997 and is documented in a report from Lakes Region Environmental Contractors, Inc. Soil samples were taken from the tank grave and no exceedances of Soil Remediation Standards (SRS) were detected. The Site Plan provided in the report appears to show the tank to the south of the three-bay garage (labeled Shed in the report's site plan). The NHDES

response to the closure report concludes that it did not appear that a discharge of petroleum that impacts surface water or groundwater had occurred.

Controlled Recognized Environmental Conditions

No *Controlled RECs* are associated with the subject property.

Vapor Encroachment Condition

No *VEC* is associated with the subject property.

De Minimis Conditions

No *DMCs* were identified to be associated with the subject property.

9.0 CONCLUSIONS

In accordance with ASTM Practice E 1527-21 requirements, the Environmental Professionals that prepared this Phase I ESA provide the following Statement of Conclusion:

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 of the parcels identified by the Town of Tamworth on Tax Map 202 Lot 35. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 10.0 of this report.

This assessment did not reveal evidence of *CRECs* or *VECs* in connection with the subject property. Four (4) *RECs* and one (1) *HREC* were identified at the subject property as described in Section 8.0.

10.0 DEVIATIONS

No substantive deviations from ASTM E 1527-21 were encountered during performance of this Phase I ESA. Limitations of this Phase I ESA are detailed in Section 1.4.

11.0 ADDITIONAL SERVICES

Additional Services are assessments, recommendations, or other details beyond the scope of ASTM Practice E 1527-21. No additional services were conducted as part of this assessment.

Based on the identified *RECs*, a Phase II subsurface investigation appears to be warranted.

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

In accordance with ASTM Practice E 1527-21 12.13, Nobis provides the following statements of qualification:

We declare that, to the best of our professional knowledge and belief, we meet the definition of *environmental professionals* as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The qualifications of the *environmental professionals* who prepared, or supervised the preparation of, this report, and who are signatories of this report, are provided below.

Travis Cohen, E.I.T
Staff Engineer

- 2 years' experience as an engineer performing field and office work for various Phase I and Phase II environmental site assessments, environmental construction projects and remedial activities for hazardous waste, petroleum, and other contaminated sites,
- Experience overseeing and coordinating with subcontractors, ground and surface water sampling, data analyzing and report writing.

Clarence "Tim" Andrews, P.G.
Director of State & Municipal Services

- State of New Hampshire Professional Geologist (NHPG License No. 743).
- Over 25 years of experience conducting various investigations to identify the extent of airborne, soil, and groundwater organic and inorganic contamination at residential, commercial, and industrial sites. Researched historical federal, state, local, and commercial records to collect background information for numerous environmental projects.
- Performed or overseen numerous Phase I ESAs and other environmental projects involving research, investigation, and data assessment of historical and current site conditions on current or former residential, commercial, and industrial properties. Investigations have included identification, assessment, and delineation of petroleum and hazardous substances released to the environment or with the potential for release to the environment.
- Project responsibilities have included interaction with clients and regulators; coordination and oversight of subcontractors; data collection, interpretation and presentation; and report preparation. Acts as technical lead or project manager on numerous water quality assessment projects and long-term monitoring projects.

1. These environmental services were performed in accordance with generally accepted practices of other consultants undertaking similar assessments at the same time and in the same geographical area. The results of this assessment are based on our professional judgment and are not scientific certainties. Specifically, Nobis Group® does not and cannot represent that the site contains no hazardous wastes, oil, or other latent conditions beyond those observed during this assessment. No other warranty, express or implied, is made.
2. The observations and conclusions presented in this report were made solely on the basis of conditions described in the report and not on scientific tasks or procedures beyond the scope of described services or the budgetary and time constraints imposed by the client. The work described in this report was performed in accordance with the terms and conditions of our contract. No other warranty, express or implied, is made.
3. Observations were made of the site as indicated in this report. Where access to portions of the site was unavailable or limited, Nobis Group® renders no opinion as to the presence of hazardous wastes or the presence of indirect evidence of hazardous wastes in that portion of the site.
4. No property boundary, site feature, or topographic surveys of the site were performed by Nobis Group® unless specifically indicated in the text of the report.
5. No sampling or testing was performed for the presence of dioxins, furans, pesticides, herbicides, radon, lead paint, urea-formaldehyde, asbestos, or polychlorinated biphenyls (PCBs) at the site unless specifically indicated in the text of the report.
6. Except as noted within the text of the report, no quantitative laboratory testing was performed as part of this assessment. Where such analyses have been conducted by an outside laboratory, Nobis Group® has relied upon the data provided and has not conducted an independent evaluation of the reliability of these data.
7. This report has been prepared for the exclusive use by the Lakes Region Planning Commission (LRPC) and the Town of Tamworth for use in an environmental evaluation of the site. This report shall not, in whole or in part, be conveyed to any other party, other than those authorized without prior written consent of Nobis Group®.

A P P E N D I X B

ASTM E 1527-21 PHASE I ENVIRONMENTAL SITE ASSESSMENT

USER QUESTIONNAIRE

Section 1 - General

The information requested in this section is intended to assist the environmental professional but is not necessarily required to qualify for one of the Landowner Liability Protections (See Section 2).

(1.) Why is the Phase I Environmental Site Assessment required?

The Town is being offered the gift of this parcel which has had past uses that could have left residue that could cause the town future liability. We're doing our due diligence to mitigate that potential liability.

(2.) What is the type of property and type of property transaction (sale, purchase, exchange, etc.)?

The property is approximately 12 acres, largely undeveloped, with a few existing structures: an office, a shop, a garage, a shed. These are all in virtually derelict condition. There may or may not be a well and some sort of undocumented septic system on the property. The property was a saw mill for decades and then was owned by a trucking company.

The land will be donated to the Town.

(3.) What is the complete and correct address of the property?

374 Tamworth Road, Tamworth NH 03886

(4.) What is the scope of services desired for the Phase I?

As described in the contract / work scope Yes ☒ No ☐

If No, please explain.

Are any considerations beyond the requirements of Practice E 1527 to be addressed?

Yes ☐ No ☐

If Yes, please explain.

(5.) Please identify all parties who will rely on the Phase I report.

The Town of Tamworth, the property owner (Norman Cloutier)

(6.) Please identify the site contact and how the site contact can be reached.

Contact for the Town is Lianne Prentice, Select Board and the property owner is Norman Cloutier. You have contact info for both on file.

(7.) Are there any special terms and conditions that must be agreed upon by the environmental professional?

(8.) Do you have any knowledge or experience with the property that may be pertinent to the environmental professional (prior environmental reports, documents, correspondence, etc. concerning the environmental condition of the property). Attach additional sheets if required.

Contact Norman Cloutier for this information. He did a clean up of the property with a DES permit.

(9) Does the user intend to retain a title company or title professional to review reasonable ascertainable title and judicial records for environmental liens or activity and use limitations (AULs)?

Yes___ No___ Our town attorney will handle this.

If Yes, will the results of the review be provided to the environmental professional?

Yes___ No___ Our attorney can provide this information.

Section 2 - Landowner Liability Protections

In order to qualify for one of the Landowner Liability Protections (LLPs)¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

NO

¹ Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs , such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

NO

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? If "yes", please explain.

NO

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

N/A

(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the property?

Yes, saw mill and trucking service

(b.) Do you know of specific chemicals that are present or once were present at the property?

Assumptions: there was a "dipping shed" for the saw mill to treat lumber to make it last longer. This was before pressure treating of wood. This involved chemicals of some sort.

The trucking company did maintenance on its fleet. There could be diesel, oil, or other automotive chemical residue.

(c.) Do you know of spills or other chemical releases that have taken place at the property?

NO

(d.) Do you know of any environmental cleanups that have taken place at the property?

Yes; for the extent of it you should talk to the property owner, Norman Cloutier. The saw mill had burned twice and there was significant rubble, metal, and other material that had been buried or shoved into the river. Mr. Cloutier obtained a permit through DES and did a large clean up. He also had several test wells dug, one remaining.

(6.) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

We only have assumptions based on stated prior use.

User Signature

I have answered the above questions in good faith and based on my knowledge of the property.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Carroll County Area, New Hampshire
Survey Area Data: Version 22, Aug 22, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Data not available.

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
21A	Colton gravelly sandy loam, 0 to 3 percent slopes	2.6	18.4%
102A	Sunday loamy fine sand, 0 to 3 percent slopes, occasionally flooded	3.4	24.5%
413A	Duane fine sandy loam, 0 to 3 percent slopes	7.9	57.1%
Totals for Area of Interest		13.9	100.0%

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Services' LUST Sites Summary Report.

A review of the LUST list, as provided by EDR, and dated 01/30/2024 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

ALLSITES: Provides information on sites in New Hampshire, with activities that either have resulted in groundwater contamination or pose a potential hazard to groundwater supplies. The regulated activities and groundwater hazards include: confirmed releases of oil or hazardous materials to the soil and/or groundwater as a result of discharges, spills, and removal of underground storage tanks; underground injection wells such as floor drains, leaching galleries, and septic systems anything other than domestic wastewater; large discharges of wastewater such as domestic wastewater septic systems which are designed to discharge more than 20,000 gpd, land application of wastewater treatment facility effluent (spray irrigation, rapid infiltration rapid infiltration basins, etc.) and unlined septage and wastewater lagoons; unpermitted hazardous waste storage facilities; landfills and other waste repositories in which groundwater quality is at risk.

A review of the ALLSITES list, as provided by EDR, and dated 01/30/2024 has revealed that there are 3 ALLSITES sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/22/2024	Source: EPA
Date Data Arrived at EDR: 06/03/2024	Telephone: N/A
Date Made Active in Reports: 06/26/2024	Last EDR Contact: 07/02/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/07/2024
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/22/2024	Source: EPA
Date Data Arrived at EDR: 06/03/2024	Telephone: N/A
Date Made Active in Reports: 06/26/2024	Last EDR Contact: 07/01/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/07/2024
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/22/2024

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/25/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Southeast Map:	17175787 OSSIPEE LAKE, NH
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
33003C0460D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
33003C0480D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
TAMWORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
Not Reported	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Devonian
Series: Devonian
Code: De (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Eugeosynclinal Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: COLTON

Soil Surface Texture: gravelly - sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively. Soils have very high and high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	8 inches	gravelly - sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 6.00 Min: 3.60
2	8 inches	9 inches	gravelly - coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 20.00 Min: 6.00	Max: 6.00 Min: 3.60
3	9 inches	22 inches	gravelly - loamy fine sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 6.00 Min: 3.60
4	22 inches	72 inches	very gravelly - loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 20.00 Min: 20.00	Max: 6.50 Min: 4.50

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subinvariant soil types may appear within the general area of target property.

Soil Surface Textures: loamy sand
very stony - fine sandy loam
silt loam
fine sandy loam
mucky-peat
muck
unweathered bedrock

Surficial Soil Types: loamy sand
very stony - fine sandy loam
silt loam
fine sandy loam
mucky-peat
muck
unweathered bedrock

Shallow Soil Types: loamy sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

silt loam
 loamy fine sand

 Deeper Soil Types: fine sand
 loamy sand
 stratified
 mucky-peat
 sand
 fine sandy loam
 unweathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: US Fish & Wildlife Service

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Nobis Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Nobis Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # DFC1-41EF-80DC
PO # 374 Tamworth Road
Project 374 Tamworth Road

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: DFC1-41EF-80DC

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.
